- ✦ Hearing aid compatible

Building success with the business telephone leader

The Model 392 offers complete access to both network and interactive services to take optimum advantage of two-line service.

Plug in this interactive screenphone and discover the variety of new interactive services just waiting for you. You can get stock quotes, make airline reservations, get directory assistance, and much more — right from the screen of your phone*. The Model 392 makes it so easy.

With a large display screen and six changing "softkeys," the Model 392 walks you through many interactive services, right in your home or office. Information is clearly displayed on the large backlit screen. Then, you can use the softkeys to make your choices from a series of menus.

Subscribe to network services like Call Display and Visual Call Waiting, and you'll see the caller's name and number before you answer*. Even if you're on another call, the Model 392's display shows who's waiting — and gives you options for handling the waiting call*.

Is this the call you've been waiting for? Can't take the waiting call right now? Send a "please wait" or "call later" message*. Or, just forward the call to Voice Mail*.

When it comes to making calls, the Model 392's large display screen makes a world of difference. Save up to 200 numbers in your Directory for fast, easy dialing. Place calls without lifting the receiver. The display even offers network services — like Busy Redial — right when they're needed most*.

And, the Model 392 cuts through the confusion of activating or terminating services such as Selective Call Forwarding, Call Rejection, and Call Acceptance*. You'll never have to flip through pages of information to use the features. The Model 392's menus remove all the frustration via screen displays and soft keys.

All this plus the exceptional quality of Astra Telecom. The Model 392 is nothing short of extraordinary.
