

TeleVantage for Banks

Open Systems IP-PBX

Exceptional service, a personal touch, and a full suite of services are what you strive to deliver to your customers. Accordingly, you need a phone system that handles calls efficiently and effectively, allowing your staff to project the professionalism and build the relationships with customers that are such integral parts of your business. You need to assure your customers that they made the right banking choice – and that you value their business – with each communication.

TeleVantage® helps you maximize your telephone interactions and deliver the personal touch in a 24x7 environment, enabling you to achieve your relationship banking goals. With TeleVantage, you will have the confidence that comes from purchasing a phone system that will best serve your customers, while also providing a user-friendly experience for staff.

TeleVantage is a flexible, affordable IP-PBX that enhances customer service, increases productivity and improves the bottom line.

Key Benefits:

A Customer-Oriented Tool for Improving Service and Building Relationships

“When you consider all of the features, flexibility and cost savings compared to other products, TeleVantage is an outstanding product.”

*Don Bernstein, First National Bank
in Fleetwood*

- **Offer personalized service**
- **Increase productivity and efficiency**
- **Integrate with vital business applications**
- **Simplify communications across multiple locations**
- **Keep remote employees connected**
- **Record and archive calls without expensive add-on equipment**
- **Ensure security and quick disaster recovery**
- **Reduce administrative expenses and service calls**
- **Optimize staff performance**
- **Protect your investment with open-systems architecture**

Artisoft's TeleVantage maximizes telephone efficiency across your enterprise. Designed on an expandable, open architecture, the menu of user-friendly features dramatically improves the quality of customer service you can deliver. And with virtually no learning curve, your business will begin seeing positive results from the very first day.

Offer personalized service

TeleVantage helps you nurture customer relationships with individualized features, such as personalized voice mail greetings or routing a customer's call to a specific service representative every time. This specialized treatment reinforces each customer's significance as a VIP – not just another account number – and will keep them coming back for all their banking needs.

Increase productivity and efficiency

TeleVantage turns the telephone into a time and money-saving tool, with an easy-to-use graphical interface that makes all your phone tasks quick and easy. Play (and replay) important voice mail messages first – no more wading through lists, or endlessly hitting the pound key. Easily transfer or record calls, or set up conference calls with a few simple mouse clicks. To help you juggle multiple incoming calls, TeleVantage identifies who is calling so you can always take important calls first. To return calls, simply point-and-click on the number. TeleVantage saves time and makes your entire organization more efficient and productive.

Integrate with vital business applications

The open architecture of TeleVantage allows it to easily integrate with other software programs that are critical to your business, including popular data processing systems. A customer's account data or other business-related records can be pulled up automatically as a call is being answered. With TeleVantage, you can immediately have caller information at your fingertips, allowing your staff to answer questions efficiently and intelligently.

Simplify communications across multiple locations

The benefits of TeleVantage can easily be expanded to multiple locations. You can operate all of your branch locations as a single telephone system, streamlining communications and service.

Administer your TeleVantage system from one central location, saving duplicate system costs and ensuring a consistent, positive experience for all of your customers. And by utilizing site-to-site Voice-over-IP (VoIP), TeleVantage eliminates long-distance toll calls to your other locations, resulting in instant savings on your phone bill.

Keep remote employees connected

Whether they're working from home or visiting another branch, TeleVantage keeps all employees completely connected. With seamless call forwarding, callers simply dial one phone number and TeleVantage will try as many extensions or numbers as needed to find you, sequentially or simultaneously. Eliminating "telephone tag" will dramatically improve customer service and satisfaction. And home phones, cell phones, or home office IP phones are fully functional TeleVantage office extensions providing the same powerful features no matter where you are located.

"One of the goals for IT is to introduce technology that will enhance client service management and TeleVantage clearly meets that goal."

*Andrew Maychruk
The PrivateBank and Trust Company*

Descriptive Windows-based pull-down menus make it easy to perform any call handling command with the click of a mouse.

Record and archive calls without expensive add-on equipment

TeleVantage provides a flexible solution for recording and archiving telephone interactions. And unlike other telephone systems, these capabilities can be performed without purchasing expensive add-on equipment. TeleVantage lets you specify which phone lines, extensions or call center queues to record, allowing others to remain private. You can also record conversations on demand with the click of a button.

Ensure security and quick disaster recovery

Since TeleVantage sits on your network server inside your firewall, your phone system, contact lists, and customer information are just as secure as the other bank data on your server. This assures privacy for your customers and the safety of their investments. In addition, the ability to quickly restore your communications capabilities is a critical component of a

The easy to use PC interface lets you prioritize your voice mail, record and archive important messages and quickly access your call history - all with a point-and-click.

disaster recovery plan, and TeleVantage provides a stable solution for ensuring business continuity during emergency situations. All auto attendant prompts, call recordings, voice greetings, voice mail messages, call rules, call logs, etc., can either be backed up locally or kept at a remote location in the same manner as your financial records. Automated call routing lets employees take calls from any temporary location — your customers need never know where their call is being serviced.

Reduce administrative expenses and service calls

TeleVantage is both simple and inexpensive to maintain. Changes such as adding or moving users or voice mailboxes can easily be made in-house, eliminating the downtime spent waiting for outside service vendors. TeleVantage is software-based, allowing you to modify it quickly and easily using basic point-and-click commands. The wide range of advanced, cost-effective features, easy administration and maintenance, and near-limitless expansion and flexibility make TeleVantage a quick return on your investment.

Optimize staff performance

TeleVantage ensures a high level of service for your transaction banking customers while improving the productivity of your staff. With the optional TeleVantage Call Center, incoming calls are distributed intelligently and efficiently, ensuring that heavy call volume won't result in dropped calls or long hold times. This flexible, comprehensive solution can generate a full suite of statistical reports that enable you to optimize staffing levels, and measure service performance. TeleVantage can also help you train new service representatives quickly and effectively using the call coaching and monitoring features.

“TeleVantage is easy to use and call management is a smooth and easy process — a major advantage over other phone systems.”

*Malcolm Wang
Assistant Vice President and Vancouver Branch Manager
First Commercial Bank*

Protect your investment with open-systems architecture

The open architecture of TeleVantage lets you add and subtract features as your phone system needs change. It also provides the flexibility you need as your business grows. No longer will you be locked into using a single vendor or proprietary hardware. TeleVantage easily accommodates your changing system needs today and tomorrow. It never becomes obsolete — it only becomes more useful over time.
